Passive income

Why Jv morgans AI Bot?

Fast execution

- Once trained, the AI predicts market movements or identifies opportunities (buy/sell signals). Some models react in milliseconds (called high-frequency trading or HFT).

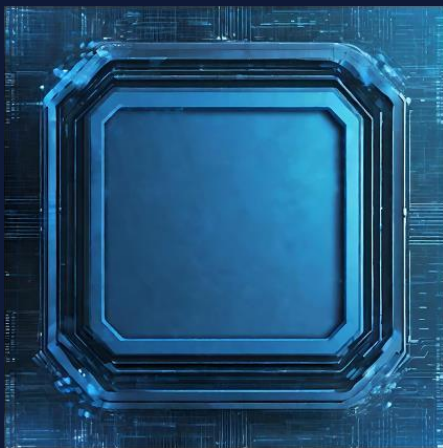

New Trading Strategies

- AI can find patterns invisible to humans, leading to entirely new strategies that weren't possible with traditional technical or fundamental analysis.

Bottom line

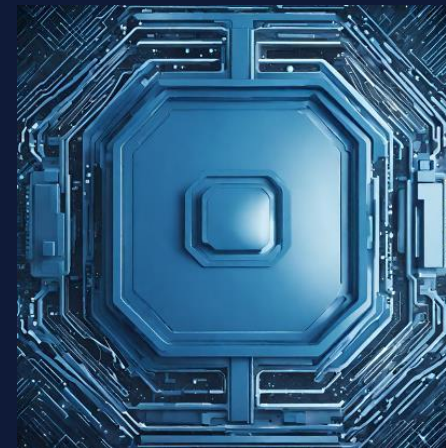

- AI is transforming trading from being based on gut feeling and experience to data-driven, emotionless decision-making.
- In the future, most market moves might be algorithm vs algorithm with humans just watching.
